

Better Administration. Smarter Cities.

Hyperlocal Property Taxation System for Smart Cities

www.transervetechnologies.com

IS YOUR CITY SMART?

Cities need to be treated as Small Business Units.

Income & expenditure to be Re-modelled.

Smooth & regular tax collection system.

To treat citizens as customers of city services.

Municipalities are under tremendous pressure to continually deliver citizens' need for a clean, healthy and safe city.

To match the global standards of basic amenities such as clean drinking water, proper waste management, adequate power supply and healthcare, city administrations are under constant financial strain.

For a city to be smart, it must have a robust revenue collection system. Many cities, unfortunately, lack means to collect and analyze real time data of existing and emerging buildings and associated utility services, resulting in poor revenue collection.

Think of a smart solution that helps city administrators take viable decisions easily through hyperlocal data collection, automatic updates and sophisticated reports and infographics.

Think of SmartMu™.

SMARTMU: TRANSCENDING TO SMARTER CITIES

SMARTMU KEY FEATURES:

Defined Workflow

Revenue Collection

City Intelligence - KPIs

At the core of a smart city, lies a strong and intelligent revenue management system. Transerve's Smart mu helps pragmatic municipalities in transcending to smarter cities through its expertise in collecting and analyzing residential and commercial property data, critical to city tax planning and resource management.

SmartMu is an intelligent revenue and resource management solution for real smart cities.

It offers - **Smart Solutions for Smarter Cities!**

WHAT YOU CAN DO WITH SMARTMU?

The web based GIS application automatically updates premise data uploaded in the cloud system. It further allows a snapshot view of the entire data with legends marking categories. The solution allows the viewing and downloading of top defaulter lists. In addition, visual and taxation details of each premise can also be viewed. SmartMu solutions go a step further by projecting easy-to-understand graphs and charts, facilitating prompt decision-making.

HYPERLOCAL

To the level of each premise door and floor

REAL TIME

Seamless data flow with web application

FLEXIBLE

User defined templates

MULTI-USER

Large scale data collection

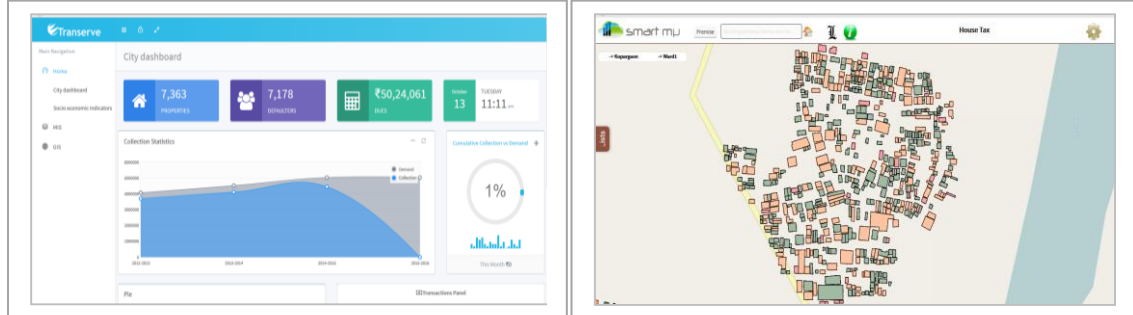

INTEGRATION

Using coordinates, maps and photographs

SMARTMU SOLUTION:

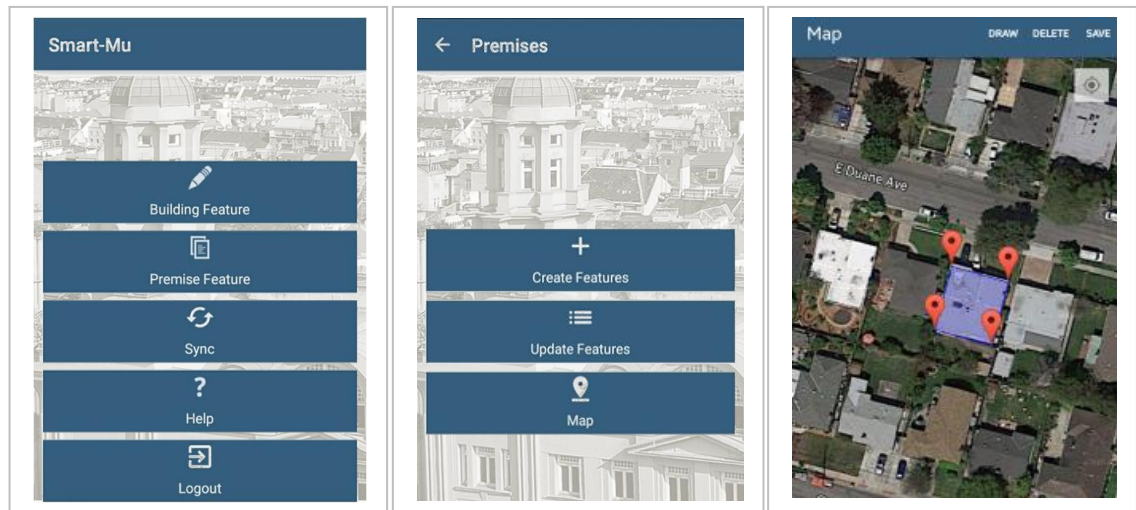

Web Solutions on Cloud:

Our cloud-based web solutions enable auto updates on your screen for critical information such as building information, tax defaulters and their distribution across the city along with floor-wise data visualization, colour legends and much more at a click or swipe.

Mobile Application:

Get real-time building / floor-wise construction data on cloud through our interactive mobile app. Our mobile application helps surveyors in conveniently filing new premises and features directly from their device to the entire cloud system.

Business Analytics Integrator:

Our business analytics integrator accurately traces premises up to the floor level, leading to efficient Tax collection and generate KPI's.

A user-friendly management tool, it enables clear understanding of data and empowers administrative decision-making through highly comprehensive infographics.

OUR KEY CLIENTS:

“

We greatly appreciate you and your team's professionalism and hard effort put into our project.
